

## Andy's Photoshop Tip #7 - Seamless Background #2

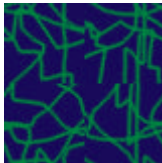

1

Make a new file that is square (this example uses 80\*80 pixels). Fill it with any color.

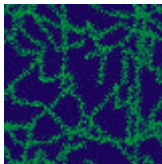

2

Draw a bunch of lines in the square.

3

Select FILTER/OTHER/OFFSET and enter in 1/2 of the width or length (40 for this example). And then select WRAP AROUND.

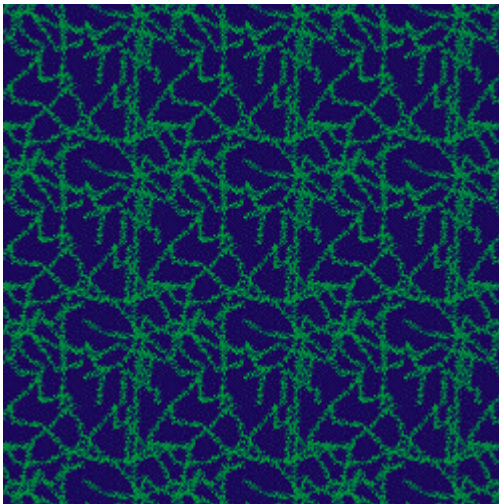

4

Now click on FILTER/STYLIZE/DIFFUSE.

5

Save the background and you're done. Look at the results:
