

## Andy's Photoshop Tip #24 - Filling Text w/Pictures

This is a rather simple tip, but I have had many people ask for it, so here you go:

- 1
  - 1
- Open up your picture or texture. Select all (CTRL+A) and copy (CTRL+C). Now press your delete key to wipe out the image.

- 2
- Go to the channels palette and create a new channel, now type your text or create your B&W image.

- 3
- Click on the RGB button and then go back to the layers palette. Now load your selection (CTRL+ALT+4) and go to EDIT...PASTE INTO. Now you have your texture inside of your selection.
