

### Andy's Photoshop Tip #30 - Simple Text Shadow

There are dozens of ways to make a drop shadow, this is yet another way.

1

Type your text in the color of the shadow you want.

2

Select all (CTRL+A) and apply the Gaussian Blur filter from the FILTER...BLUR menu. I used a setting of 2.5 here.

3

Now choose a new color for your text and type the same text on top of the shadow. Make sure the you offset the text a little to the left and up a bit to make it look more realistic.
